• Activation by Original buttons	13
• DIP Switch Settings	14

Cautions

▪ IW03LX-related

- You should check the names and colors of each wires exactly, before you connect the wires.
ex) CAN HIGH: White wires / CAN LOW: Blue wires
- The 'POWER / CAN Cable' should always be connected last and be disconnected first.
- The 'Mode Switch' is an optional part to change modes forcibly without CAN-BUS.
Generally, the CAN-BUS wires are connected for changing modes by original buttons.
- When the reverse gear is not detected by CAN-BUS,
the 'REVERSE 12V IN wire' should be spliced with 12V power of reverse light.

▪ HDMI device-related

- HDMI mode accepts general-screen resolution of HDMI devices(1080P / 1920*1080).
- Generally, '5V 1A Power output(5V USB POWER)' is a standard voltage for charging smartphone.
If you need higher voltage than 5V, you should add a separate power supply.

▪ Navigation(GPS) box-related

- When you connect the power wires(B+, ACC) to the navigation(GPS) box,
the 'NAVI (12V) OUT' wire supported by IW03LX should be spliced with an ACC wire of navigation box.
- The navigation box should be powered off before unplugging the HDMI cable.

Dimension

Exterior

- a DIP SWITCH
- b AV IN / OUT
- c TOUCH IN (Not Used)
- d MODE
- e POWER / CAN
- f HDMI IN
- g 5V USB POWER
- h NAVI IN
- i UART I/F
- j LVDS OUT

Components

POWER / CAN Cable

GVIF-IN Cable

GVIF-OUT Cable

GVIF PCB

HDMI Cable
(For GVIF)

AV IN / OUT Cable

5-Pin Micro USB Cable

Optional Parts (sold separately at the indiwork)

HDMI Cable
(Male to Male)

HDMI Extender
(For stick type HDMI device)

Mode Switch
